

ARTISTIC SOLUTIONS

**METALLIC LEAFING POWDERS**

Ultra fine metallic leafing powders produce a true metallic surface when mixed in to resin or applied in mould coatings. They are highly reflective and UV stable.

**\$35.16** (AWSC-CP-000025)

**3D Impact**

A truly unique clear fluid additive for applying to epoxy resin solutions, in particular resin art to achieve dramatic 3D surface growth and patterns integral to the epoxy surface. Chemical reactions during the curing process produces progressive organic patterns and 3D growth. The varied application techniques and addition of colours creates a whole new exciting field of visual chemistry solutions.

**\$30.85** (AWSC3DI-000125)

**Art Oil 01**

Art Oil 01 is a dispersion. The oil is applied as a drop or two onto wet resin causing a flowing out effect. When the artwork is fully cured a residue of oil will still be present, which is with a tissue and methylated spirits. A slight depression will be left on the surface. An optional top coat of clear art resin applied to the overall art piece will eliminate the depression and will further exchange the depth of the art.

**\$23.29** (AWSCAO-000025)

**RESIN ART 609**

Resin Art Epoxy Resin.

1L = 500ml A x 500ml B

Tough, flexible, water clear, self levelling, glass like epoxy coating system. Recommended for resin art, decoupage and coating wood, photographs and large surface areas.

Very popular for resin art, work either as a deep glaze on existing artwork or as a clear art medium used with inks, pigments, and dyes. When artwork long term UV stability is paramount and for the ultimate water clear clarity use Solid Coat 607 Exterior Clear Epoxy Resin.

More instructions can be downloaded here:  
[Using Art Resin 609 Instructions](#)

**Starting at: ~~\$33.49~~ \$28.90** (AWSER609-MAIN)

- Size:400-ml, 1-l, 2-l, 4-l, 8-l, 20-l, 40-l

**RESIN ART BEGINNER KIT**

Includes :

- A 400ml Kit of Art Resin 609
- 1 x 35ml container of White Pigment Paste
- 2 x 15ml containers of Pigment Pastes (Blue & Black)
- 1 x 5g container of a Neutral Pearl Powder
- 1 x Detailed How to Booklet
- Mixing utensils.

Lift the lid on your creativity. Produce amazing unique individual resin art pieces, all within a couple of hours.

Watch fascinating streams of colourful resin interplay with washes of painted pearl resin all inter reacting to your artistic input. Amaze friends with your artistry plus make some extra money by producing the latest look artworks. Solid Solutions quick and easy to use Resin Art Starter Kit lets everybody be an artist!

**\$44.95** (AWSER609KIT)

**RESIN ART PROFESSIONAL KIT**

A complete smart savings kit for setting yourself up to create multiple resin art pieces.

Contains all the regular products and colours resin artists choose,

Includes:

- A 30L Kit of ACCLAIM RESIN ART (replaces 607)
- All Colour suite of 125ml containers of Free Flow Dyes
- All Colour suite of 50ml containers of Pigment Pastes
- All Colour suite of 50ml containers of Leafing Metallic Powders
- All Colour suite of 25gm containers of Pearl Powders
- All Colour suite of 50gm containers of Shimmer Flakes
- All Colour suite of 25gm containers of Fluorescent Powders
- 1 x 125ml container of 3D Impact
- Mixing utensils
- 1.5L Lab Beaker
- Set up your own resin art studio and save as well.
- Yellow, Brown, White and Red Transparent Dye
- \$1,549.00** (AWSER609KIT-PROF)

**RESIN ART DEVELOPING ARTIST KIT**

A complete smart savings kit for setting yourself up to create multiple resin art pieces.

Contains all the regular products and colours resin artists choose,

Includes:

An 8L Kit of Art Resin 609

7 x 25ml containers of Free Flow Dyes(Orange, Red, Purple, Black, Blue, Green & Yellow)

6 x 50ml containers of Pigment Pastes(White, Orange, Phthalo Blue, Phthalo Green, Red & Black)

3 x 25ml containers of Transparent Dyes(Black, Red, White)

2 x 25gm containers of Pearl Powders(Crystal Gold & Bright Luster Satin)

1 x 125ml container of 3D Impact

1 x 150gm container of Silver Aluminium Shimmer Flakes

1 x 50gm container of Deep Gold Leafing Metallic Powder

Mixing utensils.

Set up your own resin art studio and save as well.

**\$399.00** (AWSER609KITL)

**EPOXY LIVE ACTION ART RESIN**

Epoxy Live Action Resin Art self reacts taking resin art to a new level introducing 3D like colour and sophisticated structured metal effects. Dynamic looks highly relevant to today's interiors. Mix in Solid Solutions' metal powders and create a tactile like surface of metal flakes floating above a sunken bed of metal grain. Surface applied Solid Solutions' colourants create moving droplets and structures captured in an alluring 3D effect [LIVE ACTION ART RESIN EXPANDED DIRECTIONS](#)

**Starting at: \$45.32** (AWSERLIVE-main)

- Size:750-ml, 1-5-l, 3-l, 6-l, 15-l, 30-l

**FREE FLOW DYE**

Ultra clear, Ultra UV stable, high intensity colour fast solvent dyes for use over the top of wet resin art epoxy. Free Flow Dyes provide unique intricate patterns when allowed to Free Flow over a wet resin surface in resulting in, unique and very intricate bright translucent patterns lifting resin art to a new level delicate patterns and light captured translucence.

**Starting at: \$11.24** (FFD)

- Size:125ml, 350ml, full-free-flow-dye-set-125mls, 25ml, full-free-flow-dye-set-25mls
- Color:red, black, yellow, blue, all-colors, white, purple, orange-bright, green

**FLUORESCENT POWDER SOLUTIONS**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Fluorescent Powder Solutions is a range of pigment powders that can be used to add lustrous reflective colour to a coating, casting or piece of art. Mix a small amount of Pearl Solution powder with any clear resin or polymer coating to add new depth and interest to your project. [vc\_column\_text][vc\_column][vc\_row]

**\$24.55** (FPS)

- Color:river-blue, hot-pink, hot-orange, bright-green
- Size:25-g

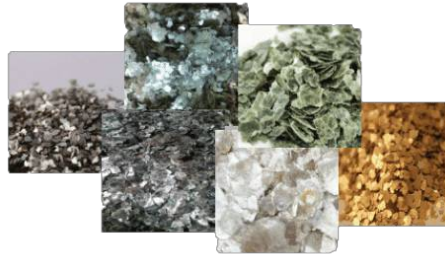

### PEARL METALLICS

Hand picked metallic pearl powders that can be used to add a lustrous 3D pearl or reflective metallic effect to a coating, casting or piece of art. Mix a small amount of Pearl Metallics' powder with any clear resin or polymer coating to add new depth and interest to your project.

**Starting at: \$12.93 (PM)**

- Size: 25-g, full-metallics-pearl-suite
- Color: synstar-gold, flash-gold, crystal-gold, royal-gold, flash-bronze, red-copper, metallic-silver, all-colors

### SHIMMER FLAKES

Naturally reflective mica of 1mm to 3mm size flakes. Shimmer Flakes, Large reflective surface area and random settling nature, combine to give a shimmering tactile surface effect. Shimmer Flakes surfaces provide a real point of difference for architectural and interior design projects or on a smaller scale incorporated with paintings, signs, sculpture or designer maker items.

**Starting at: \$18.50 (SF)**

- Color: dark-bronze, rich-gold, silver-aluminium, silver-glass, silver-jade, silver-snow, natural

Coating Solutions

**3D Impact**

A truly unique clear fluid additive for applying to epoxy resin solutions, in particular resin art to achieve dramatic 3D surface growth and patterns integral to the epoxy surface. Chemical reactions during the curing process produces progressive organic patterns and 3D growth. The varied application techniques and addition of colours creates a whole new exciting field of visual chemistry solutions.

**\$30.85** (AWSC3DI-000125)

**ACCLAIM RESIN ART**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]

- Easy 2:1 volume mix ratio.
- Further UV Enhanced Protection!
- Super new low viscosity!
- Ultimate Professional grade art resin!
- Excellent Clarity!

Acclaim Resin Art UV Resistant Premium Epoxy Resin is a two parts epoxy resin formulated for use as a hard, weather resistant, clear laminating resin for fibreglass, timber, concrete, and other materials. It can also be used as an adhesive, a clear finish coat or decoupage and for filling shallow cavities.

When filled with Q-cell, talc or similar. It can be used as a sandable filling coat. It has very good impact resistance, flexibility, and colour stability and can be tinted with the epoxy colourants.

This is our clearest resin and the choice for art work where longterm UV stability is critical.

**Starting at: \$41.20** (awser607-main)

- Size:750-ml, 1-5-l, 3-l, 6-l, 15-l, 30-l

**Clear Wood Epoxy 606**

Glass like, ultra-clear coat epoxy resin, for timber surfaces. The most glass like clarity and tough surface for wood. Matches 50 coats of varnish in one self levelling pour. Colour with Solid Solutions Pigments & Transparent Dyes for solid opaque colour. Pour on top of wood, artworks, metal badges or cast the ultimate in hard clear resin jewellery.

**Starting at: \$23.18** (CWE6)

- Size:200g, 1-kg, 4-kg, 20-kg

**RIVER RESIN DEEP CAST EPOXY**  
**NOW 2:1 BY VOLUME**

Super clear water look epoxy casting river resin. Deep casting truly water clear high UV Resistant resin, that provides a deep water pool effect. Tintable for a blue water effect and castable to around 40 mm in one pour. Ideal for river resin tables of all sizes, backlit benchtops and feature entrance doors.

**Solid Bond 330**

Use Solid Bond 330 for all methods of modern wooden boat building, including plywood stitch and glue, strip planking, cold moulding, and glued lapstrake. Solid Bond 330 is the Australian developed and manufactured epoxy for modern wooden boat.

A thin woodwork adhesive or fibreglassing resin ideal for laminating plywood or cedar strip hull plank work. Fully waterproof tough resilient epoxy glue.

**Starting at: \$46.49 (SB330)**

- Size: 1-5-l, 750-ml, 6-l, 30-l

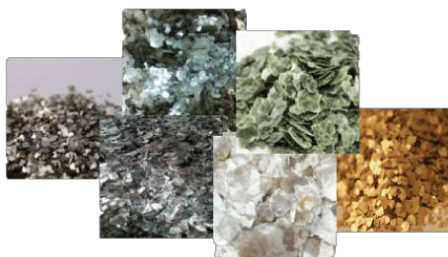

Curing temp.	23°C	40°C	70°C
Thickness (approx. 1-4mm)	4 - 5 days	22 - 26 h	> 4 h
Thickness (approx. 5 mm)	2 - 3 days	16 - 20 h	2 h
Thickness (approx. 50 mm)	1.5 - 2 days	12 - 16 h	< 2 h

**Starting at: \$34.92 (RRWE)**

- Size: 30-l, 90-l, 60-l, 15-l, 6-l, 3-l, 750-ml, 150-l

**SHIMMER FLAKES**

Naturally reflective mica of 1mm to 3mm size flakes. Shimmer Flakes, Large reflective surface area and random settling nature, combine to give a shimmering tactile surface effect. Shimmer Flakes surfaces provide a real point of difference for architectural and interior design projects or on a smaller scale incorporated with paintings, signs, sculpture or designer maker items.

**Starting at: \$18.50 (SF)**

- Color:dark-bronze, rich-gold, silver-aluminium, silver-glass, silver-jade, silver-snow, natural

**Colourant Solutions**

**METALLIC LEAFING POWDERS**

Ultra fine metallic leafing powders produce a true metallic surface when mixed in to resin or applied in mould coatings. They are highly reflective and UV stable.

**\$35.16 (AWSC-CP-000025)**

**Rapid Rust**

Grey fine iron powder for rusting, to give a genuine rusty metal look. Turn castings into genuine looking solid rusty metal. Add a dash of interest into a painting. Larger castings of epoxy resins or polyurethanes can be made by dissipating reaction heat through incorporating iron powder. Remember iron powder adds weight to castings.

**\$11.37 (AWSC-IP-000500)**

**Dynamic Pigment Paste**

Truly intense pigment pastes for colouring all your epoxy resin projects. Generally, a few percent creates a non-transparent colour. Artists use Dynamic Pigment Pastes along with our dyes for dynamic effects as the name says. Suitable for epoxy resins and polyurethane systems.

**Starting at: \$12.28 (DPP)**

- Size:50-g, full-pigment-paste-colour-suite
- Color:primrose-yellow, medium-yellow, red, orange, red-oxide, red-violet, phthalo-green, phthalo-blue, black, white, bright-yellow, yellow-oxide, all-colors

**FLUORESCENT POWDER SOLUTIONS**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Fluorescent Powder Solutions is a range of pigment powders that can be used to add lustrous reflective colour to a coating, casting or piece of art. - Size:25-g

**FREE FLOW DYE**

Ultra clear, Ultra UV stable, high intensity colour fast solvent dyes for use over the top of wet resin art epoxy. Free Flow Dyes provide unique intricate patterns when allowed to Free Flow over a wet resin surface in resulting in, unique and very intricate bright translucent patterns lifting resin art to a new level delicate patterns and light captured translucence.

**Starting at: \$11.24 (FFD)**

- Size:125ml, 350ml, full-free-flow-dye-set-125mls, 25ml, full-free-flow-dye-set-25mls
- Color:red, black, yellow, blue, all-colors, white, purple, orange-bright, green

**LEAFING METALLIC POWDERS**

Highly Reflective micro fine metal Powders for the ultimate real metal look.

They will naturally age in time just like real metal.

A dry brush onto a mould face before casting and the part will come out with a 100% metallic sheen.

**Starting at: \$16.30 (LMP)**

- Size:50ml
- Color:bright-silver, copper-gold, deep-gold, pale-gold, rich-gold

**PEARL METALLICS**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Hand picked metallic pearl powders that can be used to add a lustrous 3D pearl or reflective metallic effect to a coating, casting or piece of art. Mix a small amount of Pearl Metallics' powder with any clear resin or polymer coating to add new depth and interest to your project.  
[/vc\_column\_text][vc\_column][vc\_row]

**Starting at: \$12.93 (PM)**

- Size:25-g, full-metallics-pearl-suite
- Color:synstar-gold, flash-gold, crystal-gold, royal-gold, flash-bronze, red-copper, metallic-silver, all-colors

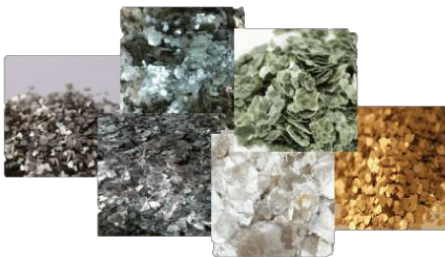

**Pearl Solutions**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Pearl Solutions is a range of pearl powders that can be used to add a lustrous 3D pearl or reflective colour to a coating, casting or piece of art. Mix a small amount of Pearl Solution powder with any clear resin or polymer coating to add new depth and interest to your project.  
[/vc\_column\_text][vc\_column][vc\_row]

**Starting at: \$10.76 (PS)**

- Size:25-g, full-pearl-colour-suite, 15-g
- Color:satin-blue, satin-red, satin-violet, satin-green, synstar-gold, flash-gold, crystal-gold, royal-gold, flash-bronze, red-copper, red-wine, synstar-orange, red-blue, synstar-red-blue, synstar-purple, bright-pure-blue, flash-jade, green-gold, 14-colours, bright-luster-satin, flash-blue, peacock-purple

**SHIMMER FLAKES**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Naturally reflective mica of 1mm to 3mm size flakes. Shimmer Flakes, Large reflective surface area and random settling nature, combine to give a shimmering tactile surface effect. **Starting at: \$18.50 (SF)**

- Color:dark-bronze, rich-gold, silver-aluminium, silver-glass, silver-jade, silver-snow, natural

**Transparent Dye**

Clear liquid dyes for colouring Transparent Epoxy Resins and Polyurethane Systems, also suitable for colouring Silicone Moulding Rubbers. One generous drop is sufficient to pigment one litre. Great visual aid when mixing, just add the dye to your catalyst and mix until the silicone is evenly coloured.

**Starting at: \$24.39 (TD)**

- Size:25-g, full-transparent-dye-colour-suite
- Color:red, black, white, yellow, brown, blue, all-colors

**Fabrication Solutions**

**Styrene Foam Machinable Sheets 25mm Thick**

Suitable for residential / agriculture, wall cladding insulation, panels cores, fabrication, model making and surfcraft. Outstanding insulation properties. Long term insulation properties not affected by dust, moisture or settling. Tongue and Groove edging.

Styrene foam is a vulnerable material which may have sustained some slight surface or edge damage during shipping and handling, prior to being offered for sale. Such imperfections are considered acceptable for Styrofoams and use as an insulation or sculpting material.

Styrene foam sheet is a foam intended for use in developing shapes of all sizes. The slabs are easily cut up using hand tools (saw etc.) or a machine and are then readily and accurately worked using conventional or electrical portable sculptor tools.

**Starting at: \$50.27**

- Size:1-sheet, 8-sheets, 16-sheets

**Styrene Foam Machinable Sheets 30mm Thick**

Suitable for residential / agriculture, wall cladding insulation, panels cores, fabrication, modelmaking and surfcraft. Outstanding insulation properties. Long term insulation properties not affected by dust, moisture or settling. Butt Edging.

Styrene foam sheet is a foam intended for use in developing shapes of all sizes. The slabs are easily cut up using hand tools (saw etc.) or a machine and are then readily and accurately worked using conventional or electrical portable sculptor tools.

**Starting at: \$76.29**

- Size:1-sheet, 7-sheets, 14-sheets

**Styrene Foam Machinable Sheets 50mm Thick**

Suitable for residential / agriculture, wall cladding insulation, panels cores, fabrication, modelmaking and surfcraft. Outstanding insulation properties. Long term insulation properties not affected by dust, moisture or settling. Tongue and Groove edging.

**3D Plastic**

Solid Solutions 3D Plastic is a breakthrough liquid plastic system enabling quick production of large or small, tough, clear or coloured plastic 3D shapes with print and graphics, all without moulds, tooling or post production printing. Solid Solution 3D plastic poured onto printed vinyl or acetate will absorb the inks during cure, permanently infusing any printed image into its surface. Solid Solutions 3D Plastic results in a tough, vibrant, 3D plastic form

**Starting at: \$20.10 (3P)**

- Size:200g, 1-kg, 4-kg, 20-kg

**Plain Weave Fiberglass - PW200**

Very stiff and lightweight, high performance laminating fabric for aircraft, automotive & model aircraft use.

1070mm Wide x 200gsm Carbon Fibre Cloth.

**\$112.77**

### ACCLAIM RESIN ART

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]

- Easy 2:1 volume mix ratio.
- Further UV Enhanced Protection!
- Super new low viscosity!
- Ultimate Professional grade art resin!
- Excellent Clarity!

Acclaim Resin Art UV Resistant Premium Epoxy Resin is a two parts epoxy resin formulated for use as a hard, weather resistant, clear laminating resin for fibreglass, timber, concrete, and other materials. It can also be used as an adhesive, a clear finish coat or decoupage and for filling shallow cavities.

When filled with Q-cell, talc or similar. It can be used as a sandable filling coat. It has very good impact resistance, flexibility, and colour stability and can be tinted with the epoxy colourants.

This is our clearest resin and the choice for art work where longterm UV stability is critical.

**Starting at: \$41.20** (awser607-main)

- Size: 1-5-l, 750-ml, 6-l, 15-l, 30-l, 3-l, 9-l

**CONTACT ADHESIVE**

Reliable and fast contact adhesive for wood, metal, leather, textile, rubber, cork, felt, PVC and many more.

**Starting at: \$19.90 (CA)**

- Size: 2-l, 4-l

**Open Weave Fiberglass - AF215**

General purpose open weave Lightweight cloth. Ideal where a natural wood finished surface needs protection. This light fabric becomes very transparent when wetted out with resin, with the weave becoming practically invisible. This allows the true beauty of the surface below to stand out through the clear resin.

**\$21.01 (RMAF215--000085)**

**Triaxial Weave - AF127**

Triaxial weave fabric that will shape to compound curves. Ideal for use over chicken wire sculpture structures used with Solid Cast 630 modified Acrylic Polymer 180gsm 1270mm wide. Only for use with Plaster Products - Not suitable for Resin work.

**\$20.27 (RMAF127-000180)**

**Solid Bond 300**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Solid Bond 300 Tough Epoxy Gel glue is a very strong translucent gel-like epoxy fully waterproof adhesive that can be trowelled up to 1cm thick without slumping. The product will cure to a hard translucent finish within 12-24 hours at temperatures down to 5°C Suitable for timberwork from laminating kitchen bench tops to boat construction. Gap filling ability enables wide cracks to be filled, may be mixed with sawdust or pigments for invisible mending. Where required small fillets of Solid Bond 305 5 Minute Epoxy Glue may be used to hold parts together whilst Solid Bond 300 is curing enabling rapid de-clamping. Steel may be bonded after degreasing and sandblasting. Fittings may be glued to masonry as can steel, stone or ceramics. Any of the above if suitably prepared can be bonded to each other. Damaged polyester and fibreglass is best repaired using epoxy, either Solid Bond 300 or where a larger hole needs laminating use Solid Bond 330 Epoxy Fibreglassing Resin and woven glass. Cracked shower bases can be permanently repaired with Solid Bond 300 as can cracked roof tiles and concrete. Loose bricks can be bonded back into place without the mess of cement. As Solid Bond 300 is waterproof it can be used to refix tiles in swimming pools and when coloured can be used as a grouting system. Bonding pebbles to surfaces is a common application of Solid Bond 300 in water features.

[/vc\_column\_text][/vc\_column][/vc\_row]

**Starting at: \$41.50 (SB3)**

- Size: 1-5-l, 300-ml, 750-ml

### Solid Bond 330

Use Solid Bond 330 for all methods of modern wooden boat building, including plywood stitch and glue, strip planking, cold moulding, and glued lapstrake. Solid Bond 330 is the Australian developed and manufactured epoxy for modern wooden boat.

A thin woodwork adhesive or fibreglassing resin ideal for laminating plywood or cedar strip hull plank work. Fully waterproof tough resilient epoxy glue.

**Starting at: \$46.49** (SB330)

- Size: 1-5-l, 750-ml, 6-l, 30-l

This is our clearest resin and the choice for art work where longterm UV stability is critical.

**Starting at: \$41.20** (awser607-main)

- Size: 1-5-l, 750-ml, 6-l, 15-l, 30-l, 3-l, 9-l

### RESIN ART BEGINNER KIT

Includes :

- A 400ml Kit of Art Resin 609
- 1 x 35ml container of White Pigment Paste
- 2 x 15ml containers of Pigment Pastes (Blue & Black)
- 1 x 5g container of a Neutral Pearl Powder
- 1 x Detailed How to Booklet
- Mixing utensils.

Lift the lid on your creativity. Produce amazing unique individual resin art pieces, all within a couple of hours.

Watch fascinating streams of colourful resin interplay with washes of painted pearl resin all inter reacting to your artistic input. Amaze friends with your artistry plus make some extra money by producing the latest look artworks. Solid Solutions quick and easy to use Resin Art Starter Kit lets everybody be an artist!

**\$44.95** (AWSER609KIT)

**RESIN ART PROFESSIONAL KIT**

A complete smart savings kit for setting yourself up to create multiple resin art pieces.

Contains all the regular products and colours resin artists choose,

Includes:

A 30L Kit of ACCLAIM RESIN ART (replaces 607)

All Colour suite of 125ml containers of Free Flow Dyes

All Colour suite of 50ml containers of Pigment Pastes

All Colour suite of 50ml containers of Leafing Metallic Powders

All Colour suite of 25gm containers of Pearl Powders

All Colour suite of 50gm containers of Shimmer Flakes

All Colour suite of 25gm containers of Fluorescent Powders

1 x 125ml container of 3D Impact

Mixing utensils

1.5L Lab Beaker

Set up your own resin art studio and save as well.

Yellow, Brown, White and Red Transparent Dye

**\$1,549.00** (AWSER609KIT-PROF)

**RESIN ART DEVELOPING ARTIST KIT**

A complete smart savings kit for setting yourself up to create multiple resin art pieces.

Contains all the regular products and colours resin artists choose,

Includes:

An 8L Kit of Art Resin 609

7 x 25ml containers of Free Flow Dyes(Orange, Red, Purple, Black, Blue, Green & Yellow)

6 x 50ml containers of Pigment Pastes(White, Orange, Phthalo Blue, Phthalo Green, Red & Black)

3 x 25ml containers of Transparent Dyes(Black, Red, White)

2 x 25gm containers of Pearl Powders(Crystal Gold & Bright Luster Satin)

1 x 125ml container of 3D Impact

1 x 150gm container of Silver Aluminium Shimmer Flakes

1 x 50gm container of Deep Gold Leafing Metallic Powder

Mixing utensils.

Set up your own resin art studio and save as well.

**\$399.00** (AWSER609KITL)

**Solid Cast 660**

Extremely fluid, white low odour reactive polyurethane that pours like water into a mould, reproducing the finest details.

It is mixed easily (1:1) and is naturally degassed. Its pot life is 2 minutes. Sets quickly into a firm, durable plastic able to be demoulded in around 15 minutes.

Handy to have for casting models, small figures, jewellery, industrial parts and decorative pieces when poured into a Solid Mould 500 silicone rubber mould.

The exclusive formulation of Solid Cast 660 allows the addition of all types of filler (mineral or metallic) to obtain different aspects, weights and volumes. For example it is possible to create objects that imitate bronze, aluminium, etc. with the appropriate fillers.

Use Polytek Poly Purge to prevent moisture absorption in your polyurethane between uses to prolong shelf life and help to avoid the formation of bubbles. Solid Cast 660 allows the addition of a high filler ratio (up to 200%) For the toughest physical properties, Solid Cast 670 is superior to Solid Cast 660.

**Starting at: ~~\$20.50~~\$16.06** (awspc660-main)

- Size:400-ml, 1-l, 2-l, 4-l, 10l, 20-l, 40-l

**Finger Form Clay**

New Finger Form Clay is Non hardening, sulphur free cream modelling clay ideally suited to silicone mould making. Smooth firm consistency which holds its shape, yet pliable and easy to shape. Always remains soft and reworkable, does not harden in the air.

**\$11.62** (AWSPCKK-000453)

**Clear Wood Epoxy 606**

Glass like, ultra-clear coat epoxy resin, for timber surfaces. The most glass like clarity and tough surface for wood. Matches 50 coats of varnish in one self levelling pour. Colour with Solid Solutions Pigments & Transparent Dyes for solid opaque colour. Pour on top of wood, artworks, metal badges or cast the ultimate in hard clear resin jewellery.

**Starting at: \$23.18** (CWE6)

- Size:200g, 1-kg, 4-kg, 20-kg

**RESIN JEWELLERY 606**

[vc\_row][vc\_column][vc\_column\_text text\_larger="no"]Glass like crystal clear lowest viscosity casting epoxy jewellery resin. The hardest glass like, scratch resistant jewellery resin blend with pigments, dyes, pearls and metal powders, the ultimate for epoxy craft work. The professionals choice for prestige pieces and mass production badge coatings.[/vc\_column\_text][vc\_column][vc\_row]

**Starting at: \$23.18** (RJ6)

- Size:200g, 1-kg, 4-kg, 20-kg

**RIVER RESIN DEEP CAST EPOXY**  
**NOW 2:1 BY VOLUME**

Super clear water look epoxy casting river resin. Deep casting truly water clear high UV Resistant resin, that provides a deep water pool effect. Tintable for a blue water effect and castable to around 40 mm in one pour. Ideal for river resin tables of all sizes, backlit benchtops and feature entrance doors.

**Solid Cast 651**

Amber coloured economic transparent epoxy potting resin with excellent performance in electrical applications such as potting and coating motor windings. Cures with low reaction heat forming a rock hard resin. Extend with silica flour for large work and lower costs.

**Starting at: \$54.97 (SC6)**

- Size: 750-ml, 1-5-l, 6-l, 30-l

Curing temp.	23°C	40°C	70°C
Thickness (approx. 1-4mm)	4 - 5 days	22 - 26 h	> 4 h
Thickness (approx. 5 mm)	2 - 3 days	16 - 20 h	2 h
Thickness (approx. 50 mm)	1.5 - 2 days	12 - 16 h	< 2 h

**SOLID SOLUTIONS ACRYLIC ONE FIREPROOF CLADDING**

Solid Solutions AcrylicOne Fireproof Cladding is a 3D modelling and construction material limited only by your imagination. Solid Solutions AcrylicOne Fireproof Cladding is a simple and safe low odour, ultra strong, weather proof casting system. It has a wide variety of indoor and outdoor applications, including: architectural panels, statues and replicas, fascia or external claddings, sets, props, models, pots, water features and castings.

Solid Solutions AcrylicOne Fireproof Cladding is odourless, solvent free, light weight and is easy to use in both solid and hollow castings. A casting made with Solid Solutions AcrylicOne Fireproof Cladding takes less time to complete, patching, sanding and finishing are all easier than with a casting made of polyester or epoxy. An additional advantage is it is a ductile and dimensionally stable material that can be cast directly into an alginate mould.

Solid Solutions AcrylicOne Fireproof Cladding has good UV resistance, high impact resistance, a class '0' fire rating and is less hazardous when compared to polyester or epoxy resins. Carved foam structures can be given a tough resin workable skin by spraying over with Solid Solutions AcrylicOne Fireproof Cladding using a hopper spray gun with a 3mm to 6mm tip or fibreglass chopper gun. Thicker surfaces can be troweled on with the addition of Solid Solutions AcrylicOne Fireproof Cladding thickener, upon cure the surface can be carved, CNC machined or easily sanded.

- Size:3-kg, 15-kg, 75-kg

**Silicone Rubber Solid Mould 500**

Solid Mould 500 is a minimal shrinkage condensation cure silicone moulding rubber. The cured rubber provides high flexibility and tear strength with 25 shore A hardness. Catalyst choice enables a minimal demould time of 3 to 4 hours or a working time of up to 40 minutes for large pours.

**APPLICATIONS**

Suitable for making delicate intricate impression moulds through to large architectural concrete moulds. Ideal for fine detailed moulds used in conjunction with Solid Cast 660 Fast Set Polyurethane for producing plastic models, figurines, jewellery and prototype parts. Solid Mould 500 is suited to larger moulding and casting work used in conjunction with concrete or plaster to produce figurines, gardenware and precast building elements.

Add 2% Catalyst by weight. Up to 10% catalyst by weight may be used for rapid demoulding in around an hour. 0.5% Shrinkage on large scale moulds.

**MATERIAL SAFETY DATA SHEET = [sm500sds](#)**

**Starting at: \$66.59 (SRSM5)**

- Size:275-g, 1-1-kg, 4-4-kg, 20-6-kg-with-slow-catalyst, 20-6-kg-with-fast-catalyst

### SILICONE RUBBER THICKENER

The new Solid Mould 500 paste thickener is unlike liquid thickeners. It's new and improved paste form does not lower the viscosity of Silicone Rubbers as the traditional liquid forms do. Add up to 5% of thickener to part B by weight and stir. Mixture will thicken immediately.

**Starting at: \$43.44 (SRT)**

- Size: 113-g, 454-g
